1 PROCEEDINGS 2 3 (6:30 p.m.) Sitting Members: Mary T. Flynn, Louis J. Bacci, Jr., Steven 4 5 Cohen, H Theodore Cohen, Hugh Russell, Tom Sieniewicz, and Ashley Tan 6 7 MARY FLYNN: Good evening. Welcome to the May 2, 8 2023 meeting of the Cambridge Planning Board. My name is 9 Mary Flynn, and I am the Chair. 10 Pursuant to Chapter 2 of the Acts of Chapter 2 in 11 the Acts of 2023 adopted by Massachusetts General Court and 12 approved by the governor, the City is authorized to use remote participation at meetings of the Cambridge planning 13 14 Board. 15 All Board members, applicants, and members of the public will state their name before speaking. All votes 16 17 will be taken by roll call. 18 Members of the public will be kept on mute until it is time for public comment. I will give instructions for 19 20 public comment at that time, and you can also find instructions on the City's webpage for remote Planning Board 21 22 meetings.

```
This meeting is being video and audio recorded and
1
2
     is being streamed live on the City of Cambridge online
 3
    meeting portal and on cable television Channel 22, within
 4
     Cambridge. There will also be a transcript of the
5
    proceedings.
                I'll start by asking Staff to take Board member
 6
7
    attendance and verify that all members are audible.
               DANIEL MESSPLAY: Louis Bacci, are you present,
9
    and is the meeting visible and audible to you?
10
               LOUIS J. BACCI, JR.: Present, visible, and
11
     audible.
12
               DANIEL MESSPLAY: H Theodore Cohen, are you
13
    present, and is the meeting visible and audible to you?
14
               H THEODORE COHEN: Present, visible, and audible.
15
               DANIEL MESSPLAY: Steve Cohen, are you present,
16
    and is the meeting visible and audible to you?
17
               STEVEN A. COHEN: I am present, visible, and
18
    audible.
19
               DANIEL MESSPLAY: Tom Sieniewicz, are you present,
20
    and is the meeting visible and audible to you?
21
               TOM SIENIEWICZ: Present, visible, and audible.
22
               DANIEL MESSPLAY: Hugh Russell, are you present,
```

```
and is the meeting visible and audible to you?
1
 2
               HUGH RUSSELL: Present, visible, and audible.
 3
               DANIEL MESSPLAY: Ashley Tan, are you present, and
 4
     is and is the meeting visible and audible to you?
5
               ASHLEY TAN: Present, visible, and audible.
 6
               DANIEL MESSPLAY: Catherine Preston Connolly, are
7
     you present, and is the meeting visible and audible to you?
               [Pause]
 9
               Absent? Mary Flynn, are you present, and is the
    meeting visible and audible to you?
10
11
               MARY FLYNN: Present, visible, and audible.
               DANIEL MESSPLAY: Thank you. That's seven members
12
13
    present and one member absent, which constitutes a quorum.
14
               MARY FLYNN: Great. Thank you, Daniel.
15
16
     (6:32 p.m.)
17
     Sitting Members: Mary T. Flynn, Louis J. Bacci, Jr., Steven
18
                       Cohen, H Theodore Cohen, Hugh Russell, Tom
                       Sieniewicz, and Ashley Tan
19
20
               MARY FLYNN: The first item this evening is an
21
    Update from the Community Development Department.
                                                        I believe
    Daniel is doing that, if you'd also introduce other Staff
22
```

1 who are present this evening.

DANIEL MESSPLAY: Thank you, Chair Flynn. Daniel Messplay here, Acting Director of the Zoning and Development Division at the Community Development Department.

With me here this evening also from the Zoning and Development Division we have Swaathi Joseph, our Zoning Project Planner, and Adithi Moogoor, our Zoning and Development Intern.

From the Community Planning Division, we're joined by our two Urban Designers, Erik Thorkildsen and Suzannah Bigolin. And we are also joined by Fabiola Alikpokou from the Cambridge Redevelopment Authority, who will be present for the third item this evening when we talk about the Design Update for PB-147.

Just a quick update: So tonight, we have a continued public hearing for a townhouse modification at 6 Lilac Court. We will also have a Design Review session for the Parcel V Triangle at Cambridge Crossing, and a Design Update for 125 Broadway.

There is no meeting scheduled for next week, so we will have a break on May 9, and then we will resume Planning Board on May 16.

```
1
               On May 16, we'll discuss the Charles Franklin et
2
     al. Zoning Petition, and also have a Design Review session
 3
     for the first building and first open space of the Volpe
    Redevelopment, which is exciting.
 4
 5
               In the realm of Council hearings, there is an
    Ordinance Committee hearing on the Craig Kelley et al.
 6
7
    Petition tomorrow at 3:00. As you recall, the Board
     forwarded a report with no positive or negative
9
     recommendation on that petition.
10
               And the Franklin et al. Petition, which we'll be
11
     discussing on May 16, there is an Ordinance Committee
12
    hearing on May 24. And that concludes this CDD Update.
     I will turn it back to the Chair.
13
14
               MARY FLYNN:
                            Thanks very much, appreciate that,
     Daniel. Are there any questions from members of the Board?
15
    Didn't see any hands, okay. All right. Then we'll move on.
16
17
18
     (6:34 p.m.)
19
     Sitting Members: Mary T. Flynn, Louis J. Bacci, Jr., Steven
20
                       Cohen, H Theodore Cohen, Hugh Russell, Tom
                       Sieniewicz, and Ashley Tan
21
22
               MARY FLYNN: The next item on the agenda is a
```

continued public hearing on case PB-009, an amendment to an approved special permit for a townhouse development located at 6 Lilac Court.

CDD Staff will begin by introducing the item. And for that, we can go back again to Daniel.

DANIEL MESSPLAY: Thank you, Chair Flynn. This townhouse development wars originally approved in 1980, and it has been amended twice previously and as recently as 2020. The proposed alterations to this townhouse involve filling in an existing mezzanine, extending a dormer and modifying existing windows.

The townhouse provisions in the zoning ordinance established that modifications after a town development has been subdivided must be specifically enumerated in the special permit decision. And these alterations were not.

Therefore, the Planning Board's action is to grant or deny the requested amendment to the special permit upon finding that the proposal meets the criteria for approval of townhouses and multifamily dwellings in Section 10.474 of the zoning ordinance, as well as City's General Special Permit Criteria.

And a memo was provided by CDD Staff with comments

on the Zoning and Urban Design elements of the proposal, and
Staff are present to answer any questions the Board may
have.

MARY FLYNN: Great. Thank you, Daniel. Now for the presentation. We'll turn to Alison Hammer, who is representing the applicant. Ms. Hammer, you'll have up to 30 minutes to present. We hope you can be as concise as possible, but we can certainly allow additional time at our discretion.

If you would start by introducing yourself and any other members of the team -- of your team who are present, we'll turn it over to you to begin.

ALISON HAMMER: Thank you, Chair Flynn, members of the Planning Board as well as the Staff who are here tonight. My name is Alison Hammer, and I'm an architect based in Newton, but previously for 20 years in Cambridge until kids got in the way.

And I'm pleased to be presenting this project tonight on behalf of my client Zi Wang and Leon Sun. And they are here as well tonight.

And perhaps before I dive into the project itself,

I'll give Zi and Leon a quick chance to just introduce

themselves to the Board and the public.

LEON SUN: Good evening, Board members. My name is Leon. Next to me is my wife Zi. We're the owners, co-owners of 6 Lilac Court.

We both moved to the Cambridge area about 10 years ago for graduate training and got married at the MIT Chapel. For many years, we lived in student dorms in Cambridgeport, and it was a dream come true to be property owners here in Cambridge after graduation.

We're both first-generation immigrants, and although I personally grew up in many countries, we both loved the City of Cambridge so much that, you know, we decided to stay here after graduation.

Since moving to Lilac Court in 2020, we have also fallen in love with our Lilac Court community. Even in the middle of the COVID pandemic, we were grateful to have very generous neighbors who offered us advice, firewood for our wood-burning stove and even helped me extricate my car when I was stuck in the snow a couple winters ago.

We also feel very grateful because I know many of our neighbors have written letters of support for our renovation project, who also invited us to their homes and

shared their renovation plans and pitfalls -- sort of firsttime homeowners like us.

Our neighbors' kindness and generosity have really encouraged us to embark on similar renovations project of our own, to make it a more comforting and inviting place for the next phase of our lives.

With that, I'll hand a virtual microphone back over to Alison to tell you more about our plans.

ALISON HAMMER: Thank you, Leon and Zi. So as I'm sure the Board is already familiar, the Board has already familiarized themselves with this project -- 6 Lilac Court is a townhouse that was originally permitted, as Daniel mentioned, in 1980 as part of PB-9, a 24-unit townhouse development.

It is one of the, you know, iconic Bell and

Fandetti Townhouses that we see sprinkled throughout

Cambridge. I think anybody who spends a lot of time in

Cambridge recognizes them immediately from their, you know,

unique massing and playful elevations and often beautiful,

lush garden settings.

I know as I lived around the corner from one for many years, and it always just seemed like a very magical

1 place that I kind of coveted.

But as an architect, as I have worked with clients including clients obviously who are in these townhouses:

While they have so many wonderful, unique characteristics, there also are elements to the way they were built that are not totally conducive to modern living, which is why many of them do undergo fairly significant renovations.

In our case, we're actually looking to make a relatively light renovation and relatively small modifications to this house to improve its livability. And I will touch on the elements that we are changing as we look through the plans and elevations.

If we could go to the next slide?

So on this slide, we -- I just wanted to familiarize you with the location on the left. You can see the area plan with the lot 4-6 Lilac Court highlighted.

These are three simple, separated townhouses, each on their own individual lot, as opposed to a condominium structure.

And you can see the 6 Lilac Court plot on its own on the rights. You can see it is -- there is quite a deep front yard, as well as a rear yard, with the exception of a

2.12 section, long section -- foot-long section of rear yard. Thank you.

That kind of jots in in that corner, which leads to some of the nonconformities that require us to be here for our special permit hearing, as well as just the fundamental fact of making changes to this development.

If you could go to the next slide, please? Thank you.

Just to familiarize you, the current exterior of the building -- as a little unit townhouse, there really isn't much to speak of as far as side elevations, unless we see the front side, the front elevation, which has a two-story bay.

And on the rear, we see the tall window, which is in a very, very high atrium space right now that kind of currently stands at almost three stories, as well as the existing dormer, which is just under nine feet long currently that we are asking to extend the to 15'.

We can go to the next slide, please.

We also wanted to include some context photos from the street, which I think they cleared that. As far as viewing this project from the public ways, it is pretty hard

to see. It's really tucked back in there.

You can kind of just see a sliver of it from

Webster Avenue and, you know, from Bristol Street even in -you know, this looks like a very, very early spring when
this photo was taken. You really can barely see it even
without leaves on the trees. So this is really a secluded
and tucked away vis-à-vis public views.

Next slide? Thank you.

I did want to just add a few photos of the interior. Again, some members of the Board may be familiar with these townhouses, though perhaps not everybody inside of them. They are very narrow floor plate buildings and quite small floor plates with small spaces.

And the rooms themselves actually have quite low ceilings, so there are these kind of like dramatic, multistory atria as well.

Another interesting design choice is the fact that there are no interior walls. So every single room, every bedroom, everything is open to each other. So, you know, certainly part of this renovation is going to be just making the space more usable and closing off walls and reconfiguring windows, as well as infilling part of this

very high atrium, so it will still be a 1.5 story space, but it won't be a, you know, 2.5 story space.

And hopefully my clients Zi and Leon will get an extra bedroom to use as they move forward into the next phase of their life.

Next slide, please? Thank you.

Here we have our Zoning Summary. You can see under Item 2, existing proposed GFA, that we are just infilling a section of GFA where there currently is.

Due to the definitions of mezzanine spaces and two-story spaces and open spaces and enclosing spaces, but since we're enclosing the space and adding a floor, we will be making a small increase to the gross floor area.

But we will -- that will be under 10 percent of the existing area of the house, and we are -- and the volume addition will be very minimal, because it's just this -- you know, six-foot dormer extension.

Next slide, please?

So as you can see from the floor plans, we are obviously keeping most things in the existing locations. We are adding a powder room with a window, and we are increasing the window in the kitchen to get a little bit

more light and ventilation in there, as well as increasing the size of the kitchen, which is even by Cambridge standards quite small right now.

And we are looking to -- you can see in the plan here and we'll see it more in the elevation -- we are going to replace an assortment of windows with one large, double sliding door.

Next slide, please?

As we move up to the kind of mezzanine and second floor, as you can see, currently on the left there is an area that is open to below that we would like to fill in, as we are also adding interior partitions.

And as part of that project of infilling that area, we would like to extend the existing dormer that is just currently in the mezzanine area to give a little bit more height and a portion of the new bedroom that we're proposing, and to be able to add an egress window for lead safety as well as, you know, light and ventilation in that new space.

Next slide, please?

And on the top floor, the changes are pretty much internal, other than some skylights.

1 Next slide? Thank you.

So you can start to see how these changes are reflected in our elevations here. We are obviously adding a skylight on the top. And you can see on the ground floor on the left we're going from a small double-hung window to side-by-side casements, as well as small awning window in the new WC.

Next slide, please?

On the little, tiny bit of side elevation that we do have, we're actually going to be removing a window, because it would interfere with the new floor, where we are looking to extend the mezzanine.

Next slide, please?

And in the rear, you can see where we are extending that dormer, again, from currently just shy of 9' to 15' and adding another side-by-side casement window there, as well as removing the existing slider and the existing double, two-story window with a four-panel glass door, two of which are operable to give my clients — to really enhance the connection between indoor and outdoor, which is certainly often a fundamental characteristic of these townhouses; they have a beautiful, deep yard that they

like to enjoy, both visually and physically.

Next slide, please?

At the very end, I just wanted to drop in an elevation. Again -- excuse me, a section just to underscore what we're trying to do here. As you can see right now, cutting through that area, it is all wide open. There's a very tall window that goes almost all the way to the eave. And, you know, every single room in the house can see out of them.

And if we go to the next slide, you can see that we will be looking to drop in the interior walls, continue that mezzanine to create the new bedroom space, put the new slider on the first floor and a new window on the second floor.

As far as neighborhood outreach and support, as my clients mentioned, they have a ton of support from their neighbors. I believe there are eight letters of support in the file.

Unfortunately, at our original hearing date, we were surprised to receive a letter at the -- kind of at the last minute, right before our hearing, which was ultimately cancelled for weather related reasons, of an abutter who

```
took issue with the project, and if we can take a few
1
 2
    minutes to answer some of the items that he brought up in
 3
    his letter, I would appreciate it. You may want to refer
 4
    back to the presentation if we can bring that back up,
5
    please.
               MARY FLYNN: I don't know if that's available.
 6
7
     think maybe what we should do is when we -- let's hear
8
    public comment.
9
               ALISON HAMMER: Okay.
10
               MARY FLYNN: Because this is a hearing.
11
               ALISON HAMMER: Yeah.
12
              MARY FLYNN: So I'm going to go to public comment,
13
     and then we will come back, and the Board will have some
14
     questions, and we can also -- we can talk about the comments
15
     at that point.
16
               ALISON HAMMER: Okay, great.
17
              MARY FLYNN: Okay?
18
              ALISON HAMMER: Thank you.
19
              MARY FLYNN: Sure, Alison.
20
               So this is a public hearing. Any members of the
21
    public who wish to speak should now click the button that
22
     says, "Raise hand." If you're calling in by phone, you can
```

raise your hand by pressing \*9.

As of 5:00 p.m. yesterday, the Board had received written communications from Parviz Parvizi, Shu Rhee, Joseph Guarino, Sarah Springer, Gilberto Russo, Lee Gresham, Alexandra Baylor, Geoffrey Smith, and Lin Yang.

Written communications received after 5:00 p.m. yesterday will be entered into the record. And I apologize if I misspoke any of those names.

I'll now ask Staff to unmute the speakers one at a time. You should begin by saying your name and address, and Staff will then confirm that we can hear you. After that you'll have up to three minutes to speak before I ask you to wrap up. And Daniel, let's see. What have we got here?

DANIEL MESSPLAY: Looks like we do have a hand.

I'll just use this opportunity to just do a final call, if anybody wishes to speak on the Lilac Court item to please use the "Raise Hand" function.

It looks like our first speaker is Parviz Parvizi. So Parviz, please unmute yourself and begin by giving your name and address.

PARVIZ PARVIZI: Hi, good evening. This is Parviz
Parvizi from 33-35 Webster Avenue. I've lived in Cambridge

for close to 20 years. This is the first property I've owned, and I'm in the process of building a long-planned home on my property.

6 Lilac is 12 feet from my property and nonconforming with respect to the 20' setback. The petitioners propose to increase and intensify their nonconformity.

Their Lilac Court neighbors are all to the side and front of their property and are unaffected by the proposed changes to the rear of 6 Lilac. Thus, Lilac Court neighbors in fact have a vested interest in seeing the Planning Board set a new precedent for violating nonconforming rear setbacks, because they would gain flexibility to pursue similar violations in the future.

By contrast, my property is negatively affected, because it is to the rear of 6 Lilac. I respectfully ask the Board to reject the special permit application, because it detrimentally affects the privacy, air, light and safety of the home I'm building.

The four elements of the application that I object to are: first, the dormer extension massing introduces massing that affects the air and light of the back yard of

my home. It consumes over 70 percent of the roof length, which violates the Cambridge Design Guidelines for roof dormers that limit dormers to half the length of the roof.

Second, the proposed additional dormer window negatively affects my privacy and imposes light pollution. The existing nonconforming window is already difficult. The petitioners have previously used it to photograph my back yard and distribute those photos publicly on numerous occasions.

Third, the proposed 300 percent increase in the rear sliding door that essentially turns it into a glass wall will bring the activities of the interior of 6 Lilac into the back yard and impose a privacy noise pollution and air pollution and light pollution burden on my property.

And finally, without a sprinkler system being installed, the proposed additional occupancy density, which increases bedrooms by 50 percent, creates additional risk of fire at 6 Lilac, which is 120 feet from the nearest public road.

Customarily in our rear C-1 zoned neighborhood, the rear setback violations that the petitioners seek would require a variance, because their nonconformity is not

preexisting, since their home was built in 1980.

The rear setback violations the petitioners propose are not necessary to the goal of gaining additional interior space. For example, 21 Lilac has a similar layout and received a special permit modification to convert their internal lofted space into living area without putting in a dormer extension or new window.

I shared my concerns over two months ago, and petitioners have not engaged me to understand my concerns; have not modified any aspect of their proposed plans.

I respectfully ask that the Board decline this application, unless the petitioners modify it. Thank you.

DANIEL MESSPLAY: Thank you.

Chair Flynn, that concludes the speakers on the list, so I will turn it back to you.

CATHERINE PRESTON CONNOLLY: Okay. Thank you. So that wraps up public comments, and we are going to move onto Board discussion. Additional written comments may be submitted for the record. To start off, do Board members have questions for either the project team or for Staff?

I see none. Oh, now I do see one. Hugh?

HUGH RUSSELL: I'd be interested in hearing the

```
response that they were going -- wanted to make?
1
 2
               CATHERINE PRESTON CONNOLLY: Okay.
 3
               HUGH RUSSELL: The abutter?
 4
               CATHERINE PRESTON CONNOLLY: Very good.
                                                        All
            So Alison, can we go back to you for you to comment
 5
     on what's happening?
 6
 7
               ALISON HAMMER: Thank you so much. If we're able
8
     to share the presentation again, so I can refer to those
 9
     slides as needed?
10
               MARY FLYNN: Yeah, Swaathi, can we do that?
11
                              Thank you, Swaathi.
               ALISON HAMMER:
12
               SWAATHI JOSEPH: Alison, can you give me the slide
    number?
13
14
               ALISON HAMMER: Yeah. We can start on Slide 2.
15
     Thank you. So we are, of course, concerned about a neighbor
    who is not happy with the proposed modifications to this
16
17
     townhouse but it is our opinion that the modifications that
18
    we are making are realistically quite minor and only --
     really don't impinge in any serious way on Mr. Parvizi's
19
20
    ability to use his future home in a reasonable and manner
21
    very similar to how it would be prior to our proposed
22
     renovation. Vis-à-vis his claim that the expanded dormer
```

introduces massing that inhibits his ability to enjoy light and air in his back yard, you know, I would just point out that we measure -- we estimate that there is about probably a little bit more than 30' between the closest edge of our proposed dormer and the closest edge of his proposed house.

First of all, this is quite a significant distance as far as, you know, Cambridge neighbors go, and the amount of space that we're adding is, again, very minor. We're talking about a 6' extension to the dormer and -- which is, again, going to be a very minimal addition of massing in terms of making any significant change to light and air in the -- in Mr. Parvizi's house or back yard.

It's also well below the ridgeline. We are not increasing height. We are not going beyond the edges of the house. We are really just taking an existing dormer, making it a little bit longer, and adding a window for life safety in that space.

He further claims that the window will violate the privacy in our home -- in his home. If we can move briefly to slide -- oh, and as long as we're on the slide, if I could just -- I don't know, Swaathi, if you know where -- which lot Mr. Parvizi lives in, if you're able to just

highlight that. It's on Slide 2. It's the lot to the left of the end of the walk, so up above. It's that lot, correct.

And my understanding is that Mr. Parvizi Is building a new house for himself in the rear of this lot, which already has two houses in the front and is, I believe, renovating and making additions to them, as well as building a new house in the back about 21.5' from the rear lot line of his -- of the lot.

So if we could go now to slides 11 and 12 briefly?

So -- yeah, so we actually -- I just wanted to

note that we are actually removing the window -- two windows

that are on the portion of 6 Lilac Court that are closest to

Mr. Parvizi's property, being the upper window here, and

then if we look at slide 12, we are going to also be

removing the window on the corner of the house again, which

are the parts of this townhome that are actually closest to

that tiny, 2' bit of rear lot line.

If we can jump back to Slide 6 for -- or Slide 5, which is Number 6 right there with the interior photos?

Thank you.

If we look at the bottom left -- bottom right

photo, you can see those windows that we are going to be removing. And we feel that those windows are windows that actually perhaps do look a bit onto Mr. Parvizi's property that we will be removing, as well as -- again -- putting these internal walls into the building, so in fact many fewer spaces will have views out of those rear windows and into the rear yard.

If we want -- as far as the claims about the patio door bringing noise and air pollution, it is -- there is already a patio door.

And I don't see how it's -- we are getting a very beautiful, high-end, well-engineered door that is not going to allow additional sound transmission or anything like that, and the clients already -- the owners of 6 Lilac Court already have and utilize their back yard.

Having a different door back there is not going to change in any way the fact that they are going to use their back yard in a normal manner, as one does.

Plus, while we understand that it is a larger than normal door, they want to make use of their views into their beautiful back yard, which is surrounded on all sides by a fence. So having a larger window here really just means

that they ultimately are going to look at their own back yard and their own fence. It really doesn't give them any type of intrusion into neighbors' private space, in our opinion.

That said, we obviously do understand that Mr.

Parvizi is not happy with these modifications that we're requesting. My clients are willing to commit to having blinds installed on all their windows, as well as putting plantings on their own property along their lot lines shared with Mr. Parvizi, just to help with his concerns about privacy.

To quickly answer also some of the kind of procedural things that he brought up, I think in terms of fire safety, as we go into our construction document phase, hopefully following this meeting and any further administrative things we need to deal with, we will certainly follow the guidance of our co-consultants and the Building Department. If sprinklers are required, we will certainly put them in.

There -- as far as his question about the Dormer Guidelines, we certainly do understand that we are over the 50 percent, which is one of the suggested guidelines in the

1 | Cambridge Dormer Guideline.

But those are obviously Cambridge dormer guidelines, and not Cambridge dormer laws, and they are -- we have met as many of them as is practical.

We believe that as an extremely narrow lot townhouse, that it is to exceed the 50 percent rule -- guideline in this case is not an excessive ask. And further, it is one that has been previously granted on similar townhomes.

And we're, obviously, happy to respond to any other concerns of the Board.

MARY FLYNN: Okay. Thank you. Thank you very much. That, I think provided a lot of additional information for us, so great. Appreciate it.

So again, turning back to the Board, after that further explanation, does anyone have questions? And if not, we'll move on to comment.

Tom, do you have a question?

TOM SIENIEWICZ: Just a quick question. The height of the proposed sliding doors seem to be larger than -- taller than normal. Can you tell me what the dimensions of those doors are?

ALISON HAMMER: Yes. Thank you for your question,
Tom. I definitely can. I just need to pull it up here in
front of me on my computer.

And so, the reason that we have a larger than normal door there is because we will still have kind of a 2 -- a 1.5-story space there. We wanted to kind of make use of that and add something that was going to be dramatic and beautiful from inside and out and let in tons of light.

The dimension to that door in terms of height, I believe, is nine-foot-nine-and-five-eights is what I'm getting from my drawings. So it's a little, you know, taller than normal, but it's not 15 feet.

MARY FLYNN: Just to stay with the door for a minute, my understanding from the way you described it is that it's like the two middle doors that slide open, and then the two other panels are permanent? They don't --

ALISON HAMMER: Exactly.

MARY FLYNN: Yeah. Okay.

ALISON HAMMER: That is correct. It's not one of these retractable, fully disappearing walls where inside and outside become one; no, it's a double slider with the two outer panels fixed and the two inner panels operable.

MARY FLYNN: Okay, great. Thanks. All right.

Comments from the Board, then? Who would like to begin?

Probably would help to have one of the architects start off.

So I guess I'll -- Tom is smiling, so I guess I'll start with him.

TOM SIENIEWICZ: Well, I certainly appreciate the concerns of the neighbor. But I'll first start by the modifications for the inside. I don't see that there's any public interest in any of those details.

Do what you need to do on the inside of your house. That's really none of a concern to the Planning Board, except for information for how that might affect the modifications to the exterior.

On the elevation that includes the water closet and the modification to the window at the kitchen, I see no reason why that isn't consistent with the special permits and the townhouse permits that were granted in 1980.

They're modest modifications; make really no difference to the sense of the permits.

On the rear of the building, of course, it's the question about the door and the dormer. I understand -- I worked with the Dormer Guidelines for, whatever, 20 years.

The length and the details outlined are, you know, the City's best attempt to deal with every condition. But the dormer's less than 15' long, which is another aspect of the Dormer Guidelines.

So -- and it does allow for headroom in the room that they're creating there. I think whether or not that spills light, as I understand it it's kind of a right angle to the abutting property is not clear to me.

I'm more interested in a series of large sliding doors that are three feet higher than is conventional in a sliding door, which should at about 6'8", and they're described at 9'9", whether that makes a difference to the neighbor in terms of the amount of light and the amount of perceived invasion of privacy.

I think that the pollution argument relative to air quality goes down, because the wood stove is being removed.

But so it's really the light pollution, probably from those glass doors that I need to understand, and because they are significantly taller than conventional sliding doors.

MARY FLYNN: All right. Thank you. Hugh, would

1 | you like to go next?

HUGH RUSSELL: Sure. I think the proposed changes are really not very significant in terms of privacy. They are significant in terms of being able to use the new space.

Now, I live in a house that has three glass sliding doors looking on a garden. And there's no light pollution from those, because we close the blinds when it gets dark, because we don't want other people looking in and seeing us. So I think, you know, that's -- I just don't, I think it's not a big deal, and we should support homeowners who are trying to make their quirky houses more usable.

MARY FLYNN: Okay. Thank you.

Ashley let's hear from you next. Ashley, you know what? Ted beat you. Sorry. The hand went up and I didn't see it. So let me go to Ted.

I'm surrounded on all sides by houses with windows you know 10 feet away from me, and I think this neighborhood is wonderful the way it is morphing, and the way the houses are changing and showing individuality.

These are very small houses, and to allow people to enjoy them as they continue in their journey and life

together, you know, I think is wonderful. And I think this will -- you know, Cambridge is a tight community.

And we are going to be, you know, next to our neighbors. And hopefully we're all good neighbors with each other. But it seems to me they're very minor changes that will be very helpful for these people.

And I -- you know, I've heard the opponents memo several times, and I just -- seeing the pictures, I just don't see that it's really going to create any impact on them, especially where the proponents have committed to putting up blinds on the windows and doing some additional planting in the yard.

MARY FLYNN: Yep.

H THEODORE COHEN: And I am -- and we have approved similar modifications in the past in this neighborhood. So I can't imagine not approving this.

LOUIS J. BACCI, JR.: Yeah, I agree. The modifications are very slight and make the livability improved greatly.

MARY FLYNN: All right, thank you. Lou?

And also to Ted's point, a very similar modification has been done in the neighborhood. It's a

```
great little neighborhood -- my favorite neighborhood at
1
 2
     Halloween. They participate, and I think it should go
     forward.
 3
               MARY FLYNN: All right. Thank you. Ashley?
 5
               ASHLEY TAN: No other comments. I agree that the
     changes seem minor, and the lot is quite long and far from
 6
7
     even the opponents, although I understand their concerns.
     So overall I don't think it's a huge effect.
 9
               MARY FLYNN: Okay. Thank you. And Steve, did you
    want to add anything?
10
11
               STEVEN A. COHEN: There's very little that needs
12
     to be made. You know, we live in a dense community here.
    You know, I have neighbors right on top of me, as do many
13
14
    others around.
15
               I wish my neighbors lived half a mile away, but
     they don't. You know, we have decided to live in a
16
17
     community with that kind of pattern of neighbors and people.
18
              And frankly, I think that the issues here are
     relative to many, many, many other comparable issues in this
19
20
     city. I think these issues are relatively minor. Something
21
     -- that's my perspective.
22
              MARY FLYNN: Okay. All right. Thank you.
```

```
Okay. So it sounds like in general the Board
1
 2
     members are supportive of the special permit. Tom does have
 3
     some concerns about the door height, but I think perhaps we
     can put that into that Continuing Design Review, and if
 4
     you're comfortable with that?
5
               TOM SIENIEWICZ: Madam Chair, I -- you know,
 6
     listening to my fellow Board members, I don't think that's
7
8
    necessary. I mean, this -- the consensus around the Board
9
    here is that these are fairly common --
10
               MARY FLYNN: Yes.
11
               TOM SIENIEWICZ: -- relationships across property
12
     line in this city, and I appreciate that. So I'm happy to
13
14
               MARY FLYNN:
                            Okay.
15
               TOM SIENIEWICZ: -- leave it the way it is.
16
              MARY FLYNN: All right. Very good. Thank you.
17
    All right. So in order to grant the special permit, we need
18
     to make some findings, and we need to find that the proposal
    meets the criteria of the Townhouse and Multifamily
19
20
     Dwellings Section 10.47.4 of the Ordinance.
21
               And not all of these items pertain to this
22
    particular project, but the ones that are relevant there
```

are: Key features of the natural landscape are preserved, new buildings relate sensitively to the existing built environment, open space provides visual benefits to abutters and pacify functional benefits to occupants.

And I think we all agree that the changes on the exterior are fairly minimal, and that the renovation will certainly make the living situation better for the owners, and also, if the proponent is proposing to do additional planting in the rear yard, so that would also help.

We also need to find in alteration of existing nonconforming building façades section 8.22.2.c the changes, extensions or alterations on a preexisting, nonconforming structure will not be substantially more detrimental to the neighborhood than the existing condition.

And I think based on all of our comments, we have made it clear that these are, again, minor changes and don't really change the context of the existing condition.

And then last, the General Special Permit Criteria Section 10.43 -- and I won't go through those because you all know them -- So does anyone have any difficulty meeting any of those findings? Just raise your hands if you do.

Okay. Seeing no hands, then, there are a couple

```
of conditions in the Staff memo to be added into the
1
 2
     decision, including Continuing Design Review and
     certification that conditions are met.
 3
               Are there any other conditions the Board would
 4
5
     like to include? Okay. Are there any other suggestions
     from Staff at this point? No? Okay.
 6
 7
               So is there a motion, then, to grant the requested
8
     special permit with those conditions, which -- again, are in
9
     the Staff memo, based on the Board's finding that applicable
     Special Permit Criteria are met?
10
11
               STEVEN A. COHEN: Steve so moved.
12
              MARY FLYNN: Is there a --
13
               LOUIS J. BACCI, JR.: Second.
14
               MARY FLYNN: Okay. So we have a first and second.
15
    Daniel, could we have a roll call?
               DANIEL MESSPLAY: Sure. Roll call on that motion:
16
17
    Lou Bacci?
18
               LOUIS J. BACCI, JR.: Yes.
19
               DANIEL MESSPLAY: H Theodore Cohen?
20
               H THEODORE COHEN: Yes.
               DANIEL MESSPLAY: Steve Cohen?
21
22
               STEVEN A. COHEN: Yes.
```

```
1
               DANIEL MESSPLAY: Tom Sieniewicz?
 2
               TOM SIENIEWICZ: Yes.
 3
               DANIEL MESSPLAY: Hugh Russell?
               HUGH RUSSELL: Yes.
 4
5
               DANIEL MESSPLAY: Ashley Tan?
               ASHLEY TAN: Yes.
 6
 7
               DANIEL MESSPLAY: And Mary Flynn?
 8
              MARY FLYNN: Yes.
9
               [All vote YES]
10
               DANIEL MESSPLAY: That's all members voting in
11
     favor.
12
               MARY FLYNN: Very good. All right. Thank you,
13
    Board members, for a concise discussion and now we'll move
14
    on to the no item on the agenda.
15
               Alison, thank you very much for your presentation.
    Good luck moving forward with the project.
16
17
               DANIEL MESSPLAY: Chair Flynn?
18
              MARY FLYNN: Yes.
19
               DANIEL MESSPLAY: I just wanted to double check.
20
              MARY FLYNN: Oh, the extension.
21
               DANIEL MESSPLAY: Yep. I think there's an
22
    extension that we need to vote on.
```

```
MARY FLYNN: All right. That's right. You are
1
2
    correct. I just didn't turn the page, I don't think.
 3
    Or I did turn it too quickly. Right. Yes.
                                                 So I believe
    that this has been discussed with the proponent. We need
 4
5
    some additional time to draft and file the decision. So
 6
    does the permittee agree to an extension of time to June 30,
7
    2023 to file the decision?
              ALISON HAMMER: On behalf of my clients, yes.
9
              MARY FLYNN: Okay. Thank you.
10
              Is there a motion, then, to agree to an extension
11
    of time to file the decision, the extension, going to June
12
    20, 2023?
13
              STEVEN A. COHEN: Steve so moved.
14
              MARY FLYNN: Second?
15
              LOUIS J. BACCI, JR.: Louis second.
              MARY FLYNN: Okay. Thank you. Roll call vote?
16
17
              DANIEL MESSPLAY: On that motion, Lou Bacci?
18
              LOUIS J. BACCI, JR.: Yes.
19
               DANIEL MESSPLAY: H Theodore Cohen?
20
              H THEODORE COHEN: Yes.
              DANIEL MESSPLAY: Steve Cohen?
21
22
              STEVEN A. COHEN: Yes.
```

```
1
               DANIEL MESSPLAY: Tom Sieniewicz?
 2
               TOM SIENIEWICZ: Yes.
 3
               DANIEL MESSPLAY: Hugh Russell?
              HUGH RUSSELL: Yes.
 4
5
               DANIEL MESSPLAY: Ashley Tan?
               ASHLEY TAN: Yes.
 6
7
               DANIEL MESSPLAY: And Mary Flynn?
8
              MARY FLYNN: Yes.
9
               [All vote YES]
10
               DANIEL MESSPLAY: That's all members voting in
11
    favor.
12
               MARY FLYNN: Okay. So now we're concluded.
                                                            Thank
13
    you, Daniel, for catching that.
14
              ALISON HAMMER: Thank you all.
15
              MARY FLYNN: Thank you. All right.
16
17
     (7:19 p.m.)
18
    Sitting Members: Mary T. Flynn, Louis J. Bacci, Jr., Steven
19
                       Cohen, H Theodore Cohen, Hugh Russell, and
20
                       Ashley Tan
21
              MARY FLYNN: All right. We're going to move on
22
    then to the next item on the agenda, which is a Design
```

Review for case PB-179, a previously approved Planned Unit

Development by DivcoWest, known as Cambridge Crossing. And

Daniel will begin by summarizing why this is before us.

DANIEL MESSPLAY: Thank you, Chair Flynn. So this PUD, which is familiar to us all by now, was granted in 2003 and has been amended several times since then.

There are over 20 building sites, several of which are under construction. Each building site is subject to Design Review and approval by the Planning Board.

This particular Triangle is part of Parcel V, which was approved as a Phase 2 residential development, located on part of the former Lechmere Station site east of the First Street Extension. And on the approved Land Use Plan for Cambridge Crossing, the Triangle is shown as an open space with the retail use.

The applicant is seeking Design Review approval on a temporary basis for the Triangle to consist wholly of open space.

The Triangle is also the location of stormwater infrastructure for the roadways that it abuts, and the Board's action tonight is to approve the design of the Triangle or to request additional information from the

applicant before proceeding.

And City Staff has met with the applicants to discuss the proposed design. We've prepared a memo to the Planning Board highlighting the zoning, Urban Design aspects of the proposal, and Staff are present to answer any questions the Board may have.

MARY FLYNN: Great. Thank you. All right.

Mark Johnson of DivcoWest is representing the applicant this evening. Mr. Johnson, you have up to 30 minutes for your presentation, though we hope you will be as concise as possible. If you would introduce the other members of your project team as well and please begin.

JOHN RAPPAPORT: It's actually John Rappaport --

MARY FLYNN: Okay.

JOHN RAPPAPORT: -- instead of Mark tonight.

MARY FLYNN: All right. Thank you.

JOHN RAPPAPORT: So good evening. My name is John Rappaport. I'm with the Development team DivcoWest. With us here tonight is Michael Kluchman and Laura Castelli of VHB, who serve as the Landscape Architect and Traffic Engineer for the project; Paula Thompson of Beals and Thomas, Civil Engineer; Ed LeFlore of CSL Consulting; and

1 | Anthony Galluccio and Darren Baird, our legal team.

We're here tonight for the Design Review type of Triangle, a small parcel bound by Monsignor O'Brien Highway, Cambridge Street and First Street.

In 2016, the Planning Board approved the adjacent roadways and sidewalks, as configured on the 40-scale roadway plans.

In 2022, Mass DOT approved the design for Monsignor O'Brien Highway state right of way layout that abuts the Triangle to the north. So all of the roadways and sidewalks surrounding the Triangle have already been approved, which leaves the design of the land inside the Triangle.

This slide shows the overall Master Planning of Cambridge Crossing.

You will recall that as part of the land deal between MBTA and DivcoWest, DivcoWest purchased the old Lechmere Station parcel, called Parcel V, from the MBTA, which was -- which provided the MBTA with additional financing support for the GLX project.

Parcel V is a Phase 2 parcel that will not be developed until we have completed Phase 1. In the meantime,

we are building the extension of First Street through Parcel V, separating the Triangle from the rest of Parcel V.

DivcoWest would like to thank Cambridge City Staff for their participation in the design of the Triangle. City Staff suggested making the Triangle a pollinator meadow and installing speakers that play birdsong of species native to New England.

We thought this was an excellent idea, and immediately scrapped our previous approach in favor of this direction, which Michael will present in just a moment.

Next slide, please.

This slide now zooms into the triangle with First Street on the left, Monsignor O'Brien Highway across the top, and Cambridge Street along the bottom. As I mentioned previously, the sidewalks, streets and cycle tracks have all been previously approved by the Board and by Mass DOT and for the most part are already constructed.

The proposed design that you will be reviewing tonight is for the area within the Triangle.

Before we go through the Design Review slides, I'd like to briefly update the Board on some of the progress to date and programming coming up at Cambridge Crossing.

1 Next slide, please?

With the arrival of spring, the retail at

Cambridge Crossing is thriving. The slide shows the heart

of the retail strip along North First Street -- Tatte,

Lamplighter, Café Beatrice, Geppetto and the Lexington all

offer outdoor dining overlooking the park -- something you

can't get anywhere else in Cambridge.

Next slide, please?

We recently opened a residential building at Parcel I called, "Park 151." The building is over half leased, which further added to the vitality of Cambridge Crossing. It's adding to the vitality of Cambridge Crossing.

The two core and shell retail pavilions on Parcel I are completed, and we're in the process of marketing and leasing those to retail operators. The Parcel I open space, including the event lawn, will open this summer.

We're waiting for the MBTA and City of Somerville to open the community path to the west of Cambridge

Crossing. When they do, riders and walkers will have continuous path from Somerville to the cul-de-sac at the western edge of Cambridge Crossing through Parcel I to the

1 | Common and to the Charles River Reservation.

Next slide, please?

I'm happy to report a milestone in the development of Cambridge Crossing. Cambridge Crossing has enough residential units to qualify as its own voting precinct within the City of Cambridge. We worked with the Cambridge Election Commission to provide free space for a polling center in the last election and look forward to doing so again in future elections.

Next slide, please.

DivcoWest was a proud sponsor to the HerStory events that were held at Cambridge Crossing and at Cambridge City Hall. This was a celebration of the Cambridge women for whom the open spaces and streets were named at Cambridge Crossing. DivcoWest commissioned artists in collaboration with Artists for Humanity to paint the portraits, which have been displayed in both locations.

Next slide, please.

As we look forward to the summer and fall, DivcoWest is putting on a number of community events, all free and open to the public.

In addition to our usual programming of CX Summer

Nights concerts and outdoor exercise on the Common, we will
be scheduling a ribbon-cutting event for the following

spaces and milestones: The event lawn and continuation of

the retail plaza on Parcel I, the Dawes Field between

Parcels E, F, and G, and the CX connection at the Community

Path.

And with that, I'll turn the presentation over to Michael to present the landscape design for the Triangle.

MICHAEL KLUCHMAN: Thank you, John and Board members.

So this slide shows the proposed condition in the triangular space with the back sidewalk. The space is designed with a pollinator meadow at the southeast corner and southern portion of the site farthest away from Monsignor O'Brien Highway traffic.

At the northern portion of the site there are pollinator-friendly shrub and tree plantings creating a buffer between Monsignor O'Brien Highway. Stabilized, decomposed granite paths will be rendered through the space with a smooth and sedulous stopping point in the middle.

There will be a fully independent sound system with strategically placed speakers to play native New

1 England bird songs to listen to while walking through the 2 space and stopping at the swing. 3 The plan also shows locations for the proposed site such as ash urns and trash and recycle and recyclables. 4 5 On the north side of the space there will be a relocated Bluebikes Station, which was previously located 6 7 adjacent to the old Lechmere MBTA Station. DivcoWest proposes to install the Bluebikes 9 station on the Triangle Road to complement the additional 10 Bluebikes station they have already installed within 11 Cambridge Crossing -- in Parcel M, in Parcel R, and those that are planned for Parcel I. 12 13 Next slide, please. 14 This is a view looking northeast showing the 15 pollinator meadow in the foreground and the swing bench in the middle of the space. 16 17 Next slide, please. This is a view looking southeast showing the 18 Bluebikes station and the pollinator shrub planting in the 19 20 foreground. 21 Next slide, please. Thank you.

This plan shows the proposed plant material

22

palette for the space. All the perennials, grasses, shrubs and trees proposed for the area within the back of sidewalk have been selected for their value as pollinator supporters. The range of plants providing their nectar are pollen sources for flying pollinators and/or food sources for the pollinators' larval state.

A range of bloom times have also been selected so that the meadow and shrub plantings are a continuous source of pollinator support throughout the growing season. In addition, the selected plant material will also provide attractive, colorful and fragrant display for human visitors to the site.

Next slide, please.

This slide shows the proposed material palette for the space. We are following the materials palette approved by the Planning Board for Cambridge Crossing, including trash, recycling cans, ash urns, decomposed granite, et cetera, as well as the proposed swing bench, which I'll explain more in the next slide, as the one on the slide from this mill here has been recently discontinued by the manufacturer.

Next slide, please.

This slide shows the alternate proposed swing bench, which is available. It's very similar to this. That's the end of that. Thank you.

JOHN RAPPAPORT: Lastly, we want to thank CDD Staff for their memo. This was indeed a collaborative effort, and we are comfortable with the ongoing review, with respect to the various design issues that were brought up in the memo. I will briefly cover each one.

So the first two are related to seating - 1A and 1B. 1A requests for additional bench; we're happy to provide an additional bench; 1B requesting that we monitor seating demand and provide additional seating as necessary and we're absolutely happy to do that.

The second -- Number 2 about the buffer, if we could actually go to the next slide, please? And there was a request to add a buffer between the cycle track and the green space. And we're happy to add the buffer. I just want to make sure that we're understanding the request.

So on this slide, we're showing on the top what the current plan provides. It's a 10'-wide planting bed, and the trees are dimensioned kind of offset to the south. So they are 6' from the edge of the cycle track and not

centered within the 10' width.

So we were debating internally as to how to accommodate the buffer request, and whether that meant additional paving, or if that was rather plant selection, making sure that whatever plants are the understory ground cover aren't kind of a stalky, woody plant that's going to kind of lean out into the path seeking more sunlight.

So we're happy to work with Staff on developing a plan there. If we could go backwards one? Actually -- so Number 3 and 4 are both related to the nature sounds.

And we're open to ongoing review for the content and the operations of the sound system. Happy to work with City Staff and review with others as needed. So open to both.

And if we could jump ahead two slides to 17, please?

Oh, sorry, to 16. I apologize.

When we initiated the process, we thought there may be a future condition which we would consider retail in the Triangle. DivcoWest along with City Staff agreed that this parcel is better suited for passive uses and natural habitat, like the one we proposed tonight.

We do not anticipate a future condition in which we would be coming back to the Board proposing retail on the site.

So we are asking has that the portion of Parcel V, the Triangle portion we reviewed, be the kind of final Design Review, and if there are subsequent changes to this area, we would come back to the Board and ask for an additional Design Review and approval as part of that.

And that concludes our presentation. Thank you. Mary, you might be on mute.

MARY FLYNN: Thank you. While we're on this slide, I appreciate you clarifying that you're seeing this open space as permanent. I'd like Daniel just to weigh in on this, because I think his sense was that it was a minor amendment.

And if that's the way you want to go, then I don't know how that affects -- I mean, we can certainly do the Design Review now, but you may have to come back for a minor amendment anyway, I guess is what I'm thinking. But --

DANIEL MESSPLAY: Thanks, Chair Flynn. Yeah, I was a little confused. John, I don't know if you're able to provide a little bit more information there. I mean, the

other thing that we could do -- this is a part of Parcel V, and Parcel V would be subject to its own Design Review.

So what we could think about it is approving this design tonight, and then when we get to the Design Review for Parcel V, since this is Triangle is part of Parcel V, at that --

MARY FLYNN: Mm-hm.

DANIEL MESSPLAY: -- we could sort of revisit this design, and either set it in stone -- no pun intended -- or determine if, you know, we wanted to maybe think about a change at that time. Would that be agreeable?

JOHN RAPPAPORT: Yes. Yeah. And I think there's actually precedent for that. I would look to -- Parcel I was approved over a course of a few different Design Review approvals. So we would be open to that.

Whatever Design Review approval we come back for, the mixed-use development, we would include the Triangle and revisit any design modifications, or just restate the existing conditions.

MARY FLYNN: Okay. Great. All right. So this is an item of General Business, but it's the Board's practice to take public comment on Design Review for PUDs.

So let us see if there are any attendees wishing to speak. If there are any members of the public who wish to speak, you should now click the button that says, "Raise hand." If you're calling in by phone, you can raise your hand by pressing \*9.

As of 5:00 p.m. yesterday, the Board had received no written communications on this case. Written communications received after 5:00 p.m. yesterday will be entered into the record.

So I see at least one hand. So Daniel, I'll turn it over to you.

DANIEL MESSPLAY: Thank you, Chair Flynn. And
I'll just do one last call for any members of the public who
wish to speak on this item. It looks like our first speaker
is Heather Hoffman. So Heather, please unmute yourself and
begin by giving your name and address.

HEATHER HOFFMAN: Hi. Heather Hoffman, 213 Hurley Street. I think that perhaps one reason you got no written communications is that for reasons that escape me, they didn't come talk to the neighborhood.

MARY FLYNN: Hm.

HEATHER HOFFMAN: So, you know, we tend not to

send letters when no one comes to talk to us.

Anyway, the one thing that struck me the most was that I thought this parcel was supposed to be 10,000 square feet and this is 20 percent smaller than that. So I'm kind of curious as to why that changed, or perhaps my memory is just bad. That's always a strong possibility.

But I will be glad to see it be colorful. I'm curious as to whether human visitors will be confined to the paved pathways, or whether there will be actual grass or something that we can walk on and enjoy the plantings.

And one comment that I would relay from someone else is does recording of bird sounds mean that you are not expecting this to attract any birds to sing themselves? And so, I'd be curious to hear the answer to that.

Anyway, I will be happy to see some fences and ugliness disappearing. And I hope that there will be plenty of trees, and that they will be the biggest trees that you can reasonably plant because as you well know, East Cambridge keeps being deprived of more and more and more open space and trees, and DivcoWest to its credit has generally erred in the direction of more open space, rather than less. And I truly appreciate that about how they've

```
been doing their development.
1
 2
               So anyway, thank you very much.
 3
               DANIEL MESSPLAY: Thank you.
 4
               Chair Flynn, that concludes the speakers on the
5
     list. So I'll turn it back to you.
               MARY FLYNN: Okay. Very good. Well, perhaps we
 6
7
     can start -- John, if you could perhaps address some of the
8
     questions, a couple of the questions that have been raised?
 9
               JOHN RAPPAPORT: Sure.
10
               MARY FLYNN: Starting with the size of the parcel,
11
     and then the other question about real birds. I know there
12
    probably aren't very many real birds down there now, but
    perhaps with song they will be attracted as opposed to
13
14
     continuing to stay away. Anyway.
15
               JOHN RAPPAPORT: Yeah, so I have the size of the
    parcel, attraction of real birds, can pedestrians go off
16
17
    path?
18
                            Right. Mm-hm.
               MARY FLYNN:
               JOHN RAPPAPORT: And size of trees. So I'll do my
19
20
    best at some, and then I'll let Michael chime in.
21
               MARY FLYNN: Great.
22
               JOHN RAPPAPORT: On the size of the Triangle
```

parcel, the parcel is still part of Parcel V. So the overall size of Parcel V has not changed.

The Triangle and the sizing of the Triangle really was dictated by the 40-scale roadway network and Mass DOT's approval of First Street or MOB and the elements of MOB. So whatever was kind of leftover of those two processes is the palette that we have to work with.

On the birds, we -- my understanding is that we do anticipate pollinators and birds to come here.

MARY FLYNN: Mm-hm.

JOHN RAPPAPORT: The plant selection is kind of supportive of, you know, it has the types of vegetation that birds would be attracted to and attract pollinators.

So I think the sound is not a replacement or in any way trying to subvert birds to come to the site. And we actually -- we have quite a few birds. If you walk through the Common, we've got quite a variety of species.

On the size of trees -- actually on kind of being able to go off path and size of trees, Michael if I could ask you to chime in?

MICHAEL KLUCHMAN: You know this stuff a little bit better. On the birdsong question, it's a very

interesting question. I know Planning Board Staff had suggested the bird sound system, and we found a way to do that. It is -- what we're working on is a very flexible system, so I don't -- we can't find a precedent for exactly this. We know there is, you know, seasonal things and greenhouses that play bird sound, but so this is going to be a unique thing.

So we have a very flexible system. So if we need to alter the bird sound going forward or the timing, it's all very flexible. So I think this is a little bit of an experiment. It's a really interesting idea.

But yes, the idea is to have the pollinators and the birds attracted to the plants, but also the pollinators themselves. So we don't want to deter our birds. So it would be an ongoing experiment that we can easily adjust and play with our nature sounds and adjust which birds we're playing. So we're very excited about seeing how this goes.

And then on the access to the meadow area, I think maybe the Planning Board Staff can help us out a little bit. We originally had lawn areas, and there was concern about dogwalkers and other things and people actually accessing that sort of use. And so, the idea of the meadow came up.

But it wouldn't be as attractive a space. It would be more of like a pass-through space.

Again, we are making the best of it, but we're in the middle of a traffic island, a very nice one. So we don't expect it to be really a place to spend a lot of time, but to pass through and really -- you know, have an opportunity in an urban setting for really a diverse pollinator garden is really the focus here.

That doesn't mean that these things are native durable species in the meadow that could get trampled and, you know, if somebody wants to jump on them, that's probably fine, they'll bounce back. But it's not really designed as a lawn.

And then on the tree sizes, in the -- surrounding the Triangle, which has already been approved, there are a number of -- I guess we have elms and London planetrees, 3, 3.5 caliper, which really the limitation on the sizes there -- those are good sizes -- are the tree planting areas themselves and what is available in the industry. So those are larger size trees. They will be surrounding the Triangle.

And then within the Triangle, we have a couple

```
redbud trees, which, again, are flowing trees, which support
1
 2
    pollinators that are 2 to 2.5 caliper, so good-size
 3
     flowering trees in the pollinator area itself, so I'll
 4
     respond to that question.
 5
               MARY FLYNN: Great. All right. Thank you very
    much.
 6
 7
               Do Board members have questions either for the
8
    proponent or for the CDD Staff? There were a number of
9
    points raised in the Staff memo, which Mr. Rappaport did
     address, but you may have some follow-up thoughts. Yes,
10
11
     Lou?
               LOUIS J. BACCI, JR.: Yeah, just a quick one to
12
13
     the landscape architect. Is there any way we could get some
14
     increased size on the perimeter trees, caliper size? Just
15
     seems that they survive better. A lot of traffic, kids hang
     on them. So the bigger they are when they go in, the more
16
17
     luck we usually have with them surviving.
               I understand the ornamentals; they come in a
18
     smaller variety. There are smaller tree in the whole.
19
20
     it would be nice to increase the caliper size if we could.
21
               But that's all I have, I think, everything else
22
    aside: Perfect.
```

MARY FLYNN: Okay. Thank you. Any other -- okay, so I don't think people have questions, because we've already asked that a couple times. Do other folks have comments that they would like to make at this point?

No?

comment about trees, and what Heather had said too.

Obviously the bigger the better within, you know, within the constraints of the site. So I think that is an item for continuing Design Review.

Okay then, so I think you understand Lou's

Since there aren't any questions or comments at this point, I'm assuming that we're at a point where we want to approve the design as presented. If I am --

I see some thumbs up or whatever. Yep. Okay.

Yeah, I think -- personally, I think it's quite lovely. I

think it's, you know, very different from what we have in

other parts of East Cambridge and throughout the city. And

I think it'll be a wonderful experiment to have that sound

system in.

So -- and I really do appreciate the fact that you already agreed to add more seating because, you know, to Heather's point, people like to have access. But I think just having those seats available for people to really look

```
over the plantings and everything is going to be very, very
1
2
    nice. I think people will really appreciate that.
 3
               So then, we're going to approve the design subject
     to continuing Design Review by Staff, and certification that
 4
5
     if the design is in conformance with the approved plans
    before they receive the building permit.
 6
7
               So is there, then, a motion to grant the -- to
8
     approve, I'm sorry -- is there a motion to approve the
9
     design for the Parcel 5 Triangle, this portion of it,
10
     subject to continuing Design Review by Staff?
11
               STEVEN A. COHEN: Steve so moved.
12
              MARY FLYNN: Okay. Is there a second?
13
               LOUIS J. BACCI, JR.: Louis second.
14
               MARY FLYNN: Okay. Could we have a roll call
15
    vote, Daniel, please?
               DANIEL MESSPLAY: Roll call on that motion:
16
17
    Bacci?
18
               LOUIS J. BACCI, JR.: Yes.
19
               DANIEL MESSPLAY: H Theodore Cohen?
20
               H THEODORE COHEN: Yes.
               DANIEL MESSPLAY: Steve Cohen?
21
22
               STEVEN A. COHEN: Yes.
```

```
1
               DANIEL MESSPLAY: Tom Sieniewicz?
 2
               [Pause]
 3
               Absent. Hugh Russell?
              HUGH RUSSELL: Yes.
 4
5
               DANIEL MESSPLAY: Ashley Tan?
               ASHLEY TAN: Yes.
 6
7
               DANIEL MESSPLAY: And Mary Flynn?
8
              MARY FLYNN: Yes.
9
               [All vote YES]
10
               DANIEL MESSPLAY: That's all members voting in
11
     favor.
12
              MARY FLYNN: Great. Well, thank you very much for
13
    your presentation. The park really does look very, very
14
    lovely. So we look forward to see it coming to life.
15
               JOHN RAPPAPORT: Thank you for your time. Thank
16
    you.
17
              MICHAEL KLUCHMAN: Thanks, everyone. Goodnight.
18
              MARY FLYNN: Goodnight.
19
20
     (7:49 p.m.)
21
    Sitting Members: Mary T. Flynn, Louis J. Bacci, Jr., Steven
                       Cohen, H Theodore Cohen, Hugh Russell, and
22
```

Ashley Tan

MARY FLYNN: And we have another item on the agenda, which is a Design Update on Case PB-147, a previously granted interim planning overlay permit for a technical office laboratory building at 125 Broadway, which was previously known as 15 Cambridge Center.

So Daniel, can you summarize why this is before us, please?

DANIEL MESSPLAY: Sure. Thank you, Chair Flynn.

Just as a reminder, this permit was originally granted by
the Board in 1999 to construct a 210,000 square-foot office
and lab building in Kendall Square.

The permit approval documents require the Board to make findings consistent with the City's growth policies at the time, and included specific approval conditions that the plans remain in conformance with the Board's initial approval.

So this specific request was discussed at the Planning Board on November 1 of last year, at which time the Planning Board continued the hearing so that the applicant could incorporate comments and feedback from the Planning Board into a revised design.

The applicant has met with CDD and CRA Staff to discuss the revised design and are now back to show the updated design to the Planning Board.

And the Board's action is to conclude the Design

Update, leaving the design subject to continuing Staff
Review before issuance of a building permit, or to request
additional information for further review by the Planning
Board at a future meeting.

And I just want to quickly note we have City and Urban Design Staff present here to answer questions. I think we are also joined by Fabiola and Tom from the CRA, if there are any questions about the CRA process as well.

MARY FLYNN: Okay. Thank you. So the presentation tonight is being handled by Erin Prestileo --

ERIN PRESTILEO: You said that right.

MARY FLYNN: -- Oh, I did? Good. Thank you -- SMMA. You'll have up to 30 minutes for your presentation, other we hope you can be as concise as possible.

If you would please introduce your project team and begin?

ERIN PRESTILEO: Sure. Thank you. Frist, I think someone has their hand raised.

MARY FLYNN: I think he put it down. Did you have -- yeah, I think it's down.

thank you all tonight to hear this project. We are before you again this evening. My name is Erin Prestileo. I am a civil engineer with SMMA. I am joined by Daniel Watts and Steve Szramiak, also with SMMA. And let me see who's on from Biogen tonight: Michael Murphy and Tom Choyce.

So we are working on a small but very important project for Biogen. And I should start by saying that the letter before you in this PowerPoint is a letter that you should have received just about a month ago outlining a number of things which I am going to overview tonight.

But like I said, we've been working on this small but important project for Biogen since the fall of 2021 actually. It's a new oxygen tank and a replacement of an existing carbon dioxide tank. These tanks will support existing facilities and a process is in place at Building 8, which is located at 125 Broadway in Cambridge.

The site is approximately 1.7 acres. The new tanks and their associated equipment will occupy about 500 square feet, and it's proposed to be just up West Service

1 Drive.

If you could advance to the next slide. It maybe the next. Keep going. Right.

So here's the locus. You'll see the site highlighted in red there. The next slide will give an aerial view.

Yep. So we'll see Biogen Building 8. And the project location is accessed right off West Service Drive between that drive and Galileo Galilei Way.

The collection of tanks and equipment will be surrounded by fencing, and that's really what much of this review has been focused on with the City. And the letter that was just before you on the screen was submitted on April that details al of the coordination, formal and informal meetings we've had with the City, along with all of the aesthetic study, the layout changes that have been made, additional information provided to satisfy all questions, comments, concerns that we are aware of to date.

Most recently, SMMA had a working session with some of the members of the Board -- again, to review the work to date, but also provide some really essential background for the project and detail some of the specific

changes that we have made to alleviate concerns and address comments again.

We're here before you this evening to really outline the updated design, which was submitted to you in early April.

We've presented, prepared a final fence design -
I think one that will first serve security to keep kind of

folks out of this area, but will also allow visual

transparency and increase security for those not in this

enclosure and for those passing by on an existing pedestrian

pathway right adjacent to it. So we understand this kind of

balance of these two.

We've provided an additional view, if you advance this slide again. This is the plan, again. You'll see we've been requested to produce an additional view -- I'm sorry, one more slide -- of an additional view from this pedestrian pathway looking east to the West Service Drive. So that's the view from the bottom, just to get a better sense -- give you and the City a better sense of what we're proposing, and the type of impact that we're trying to leave.

Advance again.

We've also presented a study of fencing precedent in the area. So you'll see here -- again -- the project area is in yellow, and then some precedents in the city nearby of various types of fencing. You can see various types of fencing has been implemented in this area.

And if you advance again, we also studied fencing around these types of tanks in the area as well. And you'll see that -- again -- various types of fencing has been implemented to surround these similar tanks that we're proposing for Biogen.

Daniel Watts is on the call. I just would like to have him spend just a moment to talk about what we have changed, and what we are now proposing this enclosure to be.

So Daniel, I don't know if you could spend just a few moments and update the Board on where we're at right now?

DANIEL WATTS: Sure. It might be best if we go back to the image slides. Right there. Yes. Okay. So there's two components to the enclosure.

One, as you see in the bottom image viewed from the pedestrian path. There is a masonry block that is acting as a firewall -- or a fire barrier I should say --

between these tanks and the louver that is on the adjacent building.

This louver is predominantly aesthetic, but it does have one opening up near the top. I believe it's an exhaust fan for the loading dock area, which is just inside the other side of the wall from this location. And I think it is an exhaust fan. But nonetheless, codes and NFPA do require that we separate any active louver from tanks of this type.

These are CO2 and O2 -- oxygen and carbon dioxide. So neither of the gases is (sic) flammable, but regardless with, you know, tanks of this size, there is a requirement for this kind of separation.

So the wall is fundamentally masonry block. And what we are planning to do is clad it in a brick material that is similar and plays off of the brick that is currently to the existing building façade. Now, obviously, you know, that brick has been there for a while. We will try and match it as closely as we can. Whether or not it can match exactly is always questionable with natural materials like brick.

The fence portion, which is seen in both images,

has basically been tailored down a little bit from prior submissions. Prior submissions I think we were looking at a 10' fence. We're now looking at bringing that down to 8'. The expression of the security fence is by and large a vertical baluster arrangement.

There are some posts at various frequencies and at gate edges to reinforce the structure of the fence. But by and large, these are 1" square steel vertical balusters approximately 6' -- I'm sorry 6" on center or 4" to 5" on center I believe is more accurate.

Previous iterations, we did have kind of a phineal (sic/pineal?) or an arrowhead expression at the top of the balusters that was asked to be removed I think at our last meeting.

So we're looking at just steel posts or steel balusters with chamfered edges. There are a couple of horizontals in the expression. There's two up high -- approximately at 6'10" above grade, the other around 7'4" above grade, and then there is a lower one that is about 5" off, off of the slab.

We've chosen this expression because, as you saw in the precedent, there are a number of similar examples --

not only on this property, but also in the neighborhood.

And we feel that this fence solution does give the required amount of security that the tank vendor is looking for to prevent people from getting inside the enclosure and causing, you know, damage, or -- you know, operating with malicious intent.

We feel that that it offers the right amount of transparency so that it minimizes any opportunity for somebody to get into the enclosure -- if they get into the enclosure to not be observed, and also to enhance the security and safety of people who are on the pathway adjacent to this enclosure.

That's essentially, I think, the main points from our last discussion.

MARY FLYNN: Okay. Are there any other comments from your team before we move on, or does that conclude your presentation?

DANIEL WATTS: I think the only thing I would add is just the transparency -- again -- was something that was of interest to several members of the Committee to highlight the technology and just the -- you know, the function of the tank enclosure just to celebrate the kind of and ultimately

1 | nature of that. So that was one of the other elements.

MARY FLYNN: Okay. Thank you. So the CDD Staff has quickly reviewed this. They did not submit written materials, but Erik Thorkildsen is here, and he has reviewed the plans.

So Erik, perhaps you could just kind of summarize from your perspective where we are from the last time? I was not at the last hearing. I don't know if everybody else was, but you could just give us your current perspective on what's being proposed, that would be helpful.

ERIK THORKILDSEN: Sure. This is Erik

Thorkildsen, CDD. So yes, the applicant met with us to go

over the project and has done a lot to tune up the design of

the fence and the layout of the tanks previously. And we

thanked the applicant for all the efforts to kind of

continue through this somewhat long process.

The current design for the fence is much simple, more transparent, no taller than it needs to be, and it relates to other fences in the area, as you saw in the presentation, including fences around gas enclosures.

The verticality of the bars relate to the verticality of the things on the vaporizer part of equipment

that you see kind of in the middle of the view there, and to the tanks themselves.

So it seems like a pretty -- you know, sensible solution to how to provide the kind of safety of the equipment that is needed. I imagine some minor tune-up on some of the details, member dimensions, the vertical posts, the way corners are tuned and so on. But basically, it seems pretty good.

The -- however, in the previous hearing, Board hearing, the Board also suggested that this site is maybe kind of significant as a kind of visual terminus to the pedestrian path that leads from the Alewife towards -- through the new proposed Central Plaza to this, and then continues on down the path you see on the left in the upper image.

But it's -- it could be a sort of visual target, and is potentially an opportunity for art. And so, there's been considerable discussion about what that might actually be. But you can imagine art somehow integrated into the actual design of the fence -- elements added to the fence.

Treatment of the tanks themselves: You know, the Dorchester gas tanks were mentioned as an -- you know,

example of treating large tanks as sort of art opportunities.

And in our internal discussions, and with the CRA Board, there is a wide range of opinions and ideas on how significant an impact art in this location might be likely to have. And if there was to be some, what form it might take.

And so, other ideas that came up that might be worth thinking about were interpretive signage explaining the function of the tanks, which could be interesting as people go by them, historical information about area; somehow, signs that are somehow attached to the fence or even more integrated into it.

The steel-cut map of Harvard Square that's on the JFK side of the Abbott Building was also mentioned as a way of integrating something directly into the fence, rather than applying it.

And then there's still the idea of some kind of artistic painting of the tanks seems kind of appealing -not necessary, but it might be fun. So I'm not really sure
-- I don't think we have a firm conclusion on all this, and sort of wanted to see what you guys thought after seeing the

1 revised design.

If there is to be some kind of art component to this, the CDD and the Cambridge Art Council would be really happy to work to help kind of further its realization.

So thanks. I think that sort of summarizes our thoughts. CRA members are also here and --

MARY FLYNN: Right.

ERIK THORKILDSEN: -- might want to, you -- they may have complementary or contrasting thoughts on this. But anyway, that sort of seemed what we thought, at least, within the CDD. So thanks.

MARY FLYNN: Okay. Thank you, Erik, very much.

Yes. Let's turn to the CRA. Tom and Fabiola, do either of
you have any comments you want to add at this point?

TOM CHOYCE: Thank you, Madam Chair. There's a few things worth mentioning. One is we believe that the SMMA and Biogen team have made a lot of revisions along the way.

You know, initially the tanks were situated so that they were -- the image isn't there anymore, but they were side-by-side. And it was actually Sam Baglioni's suggestion to line them up so that they would reduce the

visual impact.

We chamfered the corners, both corners of the fence, so that it created better visual lines. We were concerned about the -- you know, ability to hide behind the fence from a pedestrian safety standpoint on both corners.

And so, they adapted the design for that.

And then also the transparency we felt was a sort of honest view of what the building is doing as a lab building, and rather than -- and this was actually something that had come from our Board -- a different direction than initial Staff direction, with something that was more decorative.

So our -- and through our Design Review process with the CRA Board, they wanted us to go into simpler, transparent images like you have before you.

There was some discussion about public art. And while there -- you know, when you're looking at this view that is shown here by Biogen, it looks significant.

But relative to everything else going on in the area, including the future Eversource Plaza and the much larger infrastructure that's related to that, it seemed to us to be worth focusing future public art efforts within the

public open space that's across the way as a kind of -- this will make a larger move, and let this space just be what it is, which is sort of an enclosure around an industrial facility and focus the attention in that open space. That's sort of the direction that we've been thinking. And be happy to look at those opportunities when the plaza -- the Eversource Plaza that's across the street -- comes before the Planning Board -- I assume a couple months as that schematic design gets completed by Boston Properties. MARY FLYNN: Okay. Thank you. Appreciate that, Board members, questions, comments? Yes, Lou? LOUIS J. BACCI, JR.: Yeah. I have a question. At some point in our last meeting on this, we were talking about the possibility of relocating this, instead of having it be in front of this new residential building's entrance.

So the discussion of relocating this was out no matter what happened. I'm just curious how this happened.

Being in the neighborhood, I wandered by this location, and

the basin -- the bollards and everything are already

constructed. I was curious how that got permitted?

MARY FLYNN: I don't know who is the appropriate

1 person to answer.

LOUIS J. BACCI, JR.: Yeah, me either.

MARY FLYNN: Whether it's the proponent or Tom, or anybody want to take a stab at it?

there on the site is because of the schedule -- the Blue

Garage demolition -- the contractor reached out to Biogen,

and they had known about this project in queue and mentioned

to them that the -- what the schedule was for the

demolition, and that they should probably try to, you know,

do any of the subsurface work prior to the site getting

congested. So Biogen reached out. And I think they worked

through their contractor.

And I think Tom or Michael can correct me, but they did reach out to the City and the Building Inspector, and I think they were able to get basically a slab permit to move forward with that work, based on what was happening across the way just because of the logistical issues they were about to face if they were delayed.

And I think we did have an earlier discussion to talk about trying to relocate the enclosure somewhere, you know, up and down that pedestrian walkway.

But because of the access for the refilling effort, we couldn't get too far from that kind of no-name driveway, and then trying to get it onto Galileo didn't seem like the right thing to try to -- you know, park a truck on that road.

So there was some fill requirements and some distances that we couldn't, you know, accommodate unfortunately with the -- you know, pedestrian way so we kind of had to land it where it's landing.

And it does also kind of connect back into the building in that corner. Currently there are a couple tanks within the loading dock. So logistically it made sense to kind of, you know, anchor everything there.

So that's kind of where we're at today.

LOUIS J. BACCI, JR.: My question is really does this require any signoff from the Planning Board?

TOM CHOICE: So I mean ISD did not contact us related to that slab. The CRA had -- the Board had acted upon the proposal for the tank in November of last year.

But, you know, ISD never -- had never -- this may not have been something that was -- as a slab permit may not have required a signoff by CDD or CRA, I don't know. But we

didn't hear from ISD beforehand.

LOUIS J. BACCI, JR.: Yes. This has been in place for several months. I talked to some of my friends in the neighborhood. This has been in place for a long time. This was done actually during the demolition work on this garage.

Just curious, you know, there was some discussion about relocating this to a different location if possible and so forth, but that was never going to be possible, and that's kind of a waste of time for this Board. So I don't know how you where we go from here, but I'm really curious how this got permitted.

MARY FLYNN: Okay. Do you have any thoughts on the solution for the location as it's been presented tonight that you want to share with the Board, Lou, or do you want to just hold off?

LOUIS J. BACCI, JR.: I mean, it's kind of -- as we say, set in stone right now. The pads are already in place, the bollards are in place. The only thing that hasn't been built yet is the surrounding masonry.

MARY FLYNN: Right. So you're saying your preference would be to have it in a completely different location?

LOUIS J. BACCI, JR.: My preference would have been not to have it in front of this residential building, yeah, this a brand-new residential building with these tanks in front of it. But it seems like that's what we're going to get whether we like it or not, so.

I understand the transparency of the fence, I kind of like that, but I also like the possibility of some artwork or a possible green wall. We had talked about that. I don't know how well that would stand up with the gas deliveries. They kind of put a little cold air in the -- surrounding the tanks at the time of when they fill them and purge them. So I don't know how that would work with the planting, but.

Our hands are basically tied.

MARY FLYNN: Okay. Other thoughts on the proposed solution?

Hugh, as the remaining architect of meeting this evening, sorry to keep picking on you, but I -- again, I wasn't at the last meeting. And so, what is your sense of how this corresponds to what the Board asked for the last time?

HUGH RUSSELL: I'd say this is kind of a tasteful

middle-of-the-road solution. And the proposal for the screen wall -- and as I recollected originally was a kind of inappropriate artistic screen that drew attention to itself.

So, you know, there's a lot of -- the CRA has looked at this a lot, and I have great respect for the CRA Board and Staff, and if this is the best we can get, then this is the best we can get.

And so, I'm -- you know, it's, it's not the -- exactly where you'd like it, as Lou has said, but I don't think that's something that can be easily changed. You, these tanks connect to piping, the piping serves the building. You have the tanks. It's just --

So they have done what they can to make it looking sort of dignified, and I think that's okay.

MARY FLYNN: Mm-hm. All right. Thank you for that. Thoughts from any other Board members? Okay. Seeing none -- oh, Steve? Oh, and I see you're connecting to audio. Do you have comments? Not sure he can hear us.

All right. Well, seeing no other comments at this point, then, so the alternatives for action tonight are for us to either conclude the Design Update and leaving the design subject to continuing CDD Staff review prior to the

issuance of a building permit, or we can request additional information for further review by the Planning Board at a future meeting.

And since there aren't a lot of comments, other than Lou's concern -- but as you said it's kind of set in stone literally, it seems and then otherwise there's really no other -- no other information the group needs, I think, you know, it was stated earlier that as the plaza develops, there might be an opportunity to relook at this site and think about adding in some level of art that might be appropriate, and I think that does make some sense.

I think -- yeah, personally I like the idea of the tanks and the fence, but it would be nice to find a way to incorporate, you know, something to make it a little bit more distinctive. And I understand that there may be problems with the green wall idea, but, you know, there are very many creative things can be done with art.

So I would hope that as part of continuing Design Review, that you folks would think about that, even if it happens after the installation of the fence.

So do I have a motion, then, or final comments from anybody? No? Okay. Is there a motion, then, to

```
conclude the Design Update, leaving the design subject the
1
2
     continuing CDD Staff review before issuance of a building
3
    permit?
4
              HUGH RUSSELL: So moved.
5
              MARY FLYNN: Hugh? Okay. Is there a second?
6
               STEVEN A. COHEN: Second.
7
              MARY FLYNN: Thank you. Okay. Could we have a
8
    roll call vote, please?
9
               DANIEL MESSPLAY: Sure. A roll call on that
    motion: Lou Bacci?
10
11
              LOUIS J. BACCI, JR.: Present.
              DANIEL MESSPLAY: H Theodore Cohen?
12
13
              H THEODORE COHEN: Yes.
14
              DANIEL MESSPLAY: Steve Cohen?
               STEVEN A. COHEN: Yes.
15
16
               DANIEL MESSPLAY: Hugh Russell?
17
              HUGH RUSSELL: Yes.
18
              DANIEL MESSPLAY: Ashley Tan?
19
              ASHLEY TAN: Yes.
20
              DANIEL MESSPLAY: And Mary Flynn?
21
              MARY FLYNN: Yes.
22
              [All vote YES]
```

```
1
               DANIEL MESSPLAY: That's five members voting in
2
     favor, one member voting present.
 3
               MARY FLYNN: Okay. Thank you very much.
                                                         Well,
     thanks to the proponents for your efforts to date.
 4
                                                         And, you
5
     know, hopefully this will continue to evolve in some manner
 6
     over time.
 7
               I know the CRA has always been very, very good at
8
    working with the Board, with our Board, in trying to come to
 9
     a resolution that makes everybody happy. So appreciate it.
    Appreciate your time.
10
11
               COLLECTIVE:
                            Thank you.
12
               MARY FLYNN: So that concludes the business on our
13
     agenda this evening. Are there additional comments from
14
     Staff or anything?
15
               DANIEL MESSPLAY: Just a reminder that there's no
     Planning Board meeting next week and we will resume on May
16
17
     16.
18
               MARY FLYNN: Okay. Very good. Board members have
     any other comments before we adjourn? No? Okay. Well,
19
20
    have a nice week, everyone, and the meeting is adjourned.
21
    Goodnight, all.
22
               COLLECTIVE: Goodnight.
